# An overview of the problem

---

**Determine  
officers at  
risk of  
adverse  
event w/  
public**

**Provide  
additional  
training for  
these  
officers to  
reduce risk**

**Safer officers  
& safer  
communities**

# An overview of the problem

---

**Determine  
officers at  
risk of  
adverse  
event w/  
public**

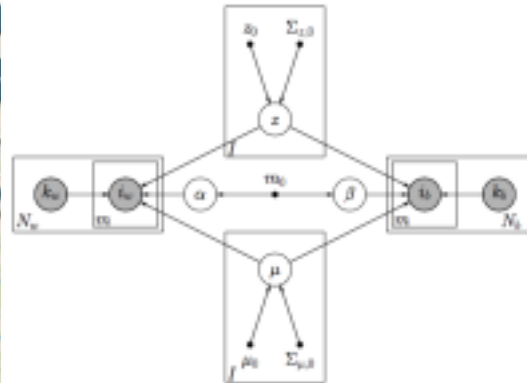

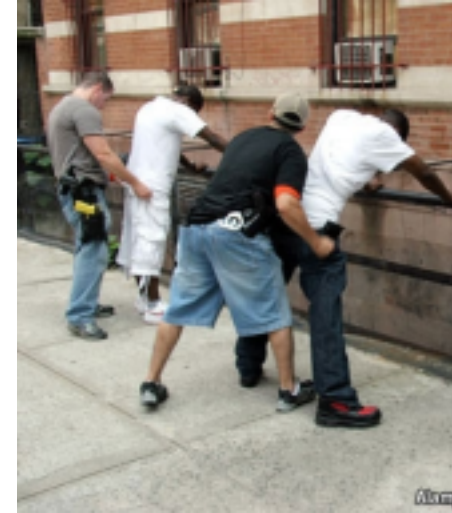

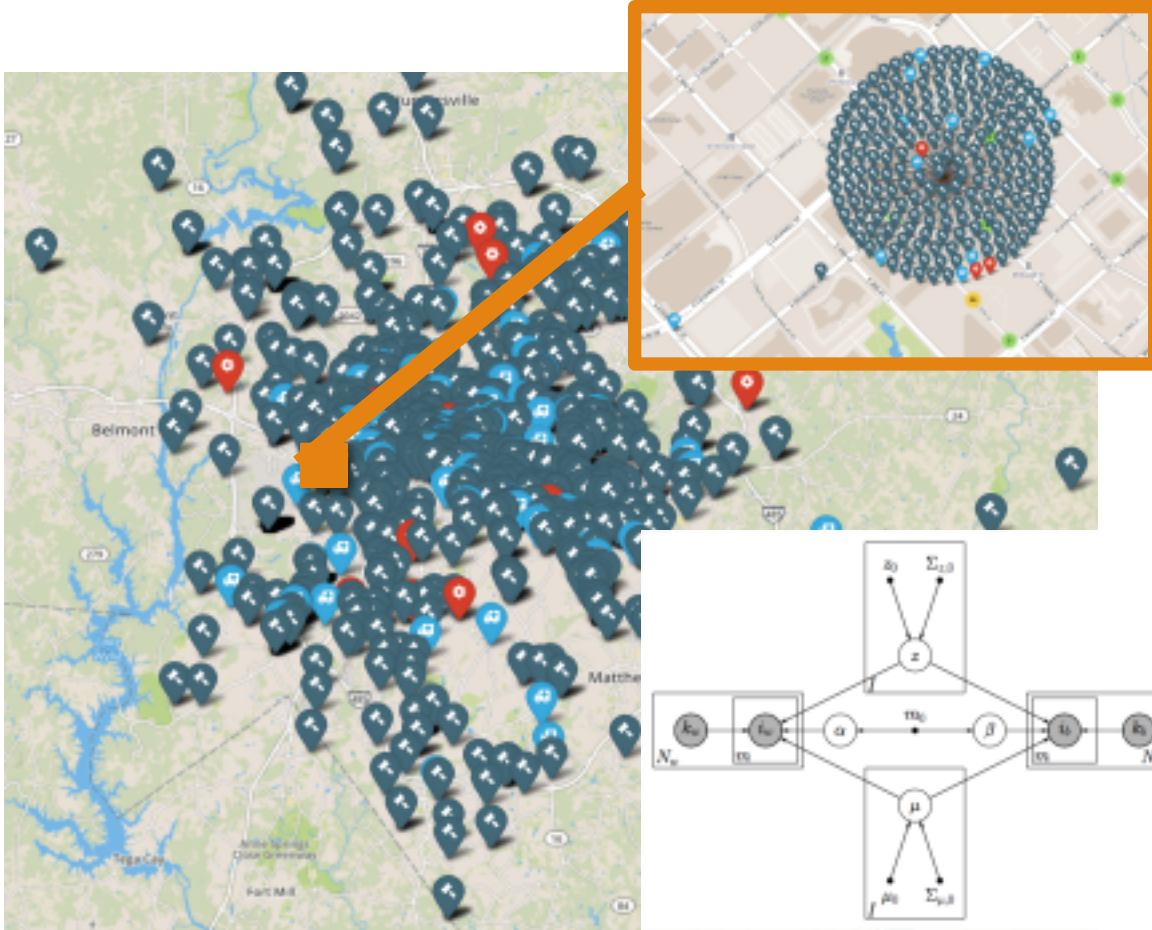

**Provide  
additional  
training for  
these  
officers to  
reduce risk**

# What is an adverse event?

- Adverse from whose perspective?
- Is one model enough?

# What training is necessary?

# Conclusion

---

- Great strides have been made!
- Future work could consider:
  - Broader definition of adverse
  - Continuing focus on data management/modeling & training/intervention
- These are great research topics! That need:
  - **\$\$\$!**
  - Broader participation
